

Curriculum Vitae

Interaction Design Student

Malmö, Sweden | +40730771774 | limit_overthe@yahoo.com

Summary

I am a 3rd-year Interaction Design student at Malmö University with a strong technical foundation in Computer Science and hardware prototyping. I have experience in coordinating and working in organising the mechatronics lab, hardware troubleshooting, and software systems (C++, Python, OSC/MIDI protocols). Interested in working with both physical hardware and software interfaces, bridging these two into one. Looking for a more hands-on "can-do" attitude for work and I am also curious for working with various systems and devices to gain experience.

Professional Experience

Teacher Assistant (IOIO Lab) | Malmö University

Sep 2024 – July 2025 | Malmö, Sweden

- **Lab Coordination:** Manage deployment and maintenance of electrical boards, Arduino kits, and specialized prototyping tools for the Interaction Design department.
- **Technical Troubleshooting:** Diagnose hardware failures and coding bugs (C++/Arduino/JavaScript) for students, ensuring high uptime for lab resources.
- **Infrastructure Maintenance:** Organize and prepare lab kits, taking the responsibility for maintaining the lab's components and logistically check on rented equipment.
- **Mentorship:** Guide students through technical setups, supervising students on building concepts into functional hardware/software prototypes.

ATM Logistics | Brink's Romania

Jul 2023 – Aug 2023 | Constanța, Romania

- **Verification & Quality Control:** Performed rigorous quality checks on ATM cash components, making sure that it follows 100% compliance with banks requirements.
- **Inventory Management:** Tracked county-wide supplies and coordinated with partner banks to fulfill all their orders of refilling their ATMs.
- **Operational Reliability:** Maintained a strict schedule of prep and delivery, demonstrating the responsibility needed for hardware-heavy verification roles.

Education

Bachelor of Science in Interaction Design

Malmö University - Interaction Design | Aug 2023 – June 2026 (Expected)

- Focus on Tangible Computing, Prototyping, and Sonic Interaction.
- **Thesis:** Building physical MIDI controllers, integrating hardware design with software protocols.

High School Diploma in Computer Science

Colegiul National Barbu Știrbei - Computer Science | Sep 2018 – Jul 2021

- Have some foundation in C++, Algorithms, and Mathematical Analysis.

Languages

- English (C1)
- Romanian (Native)
