Detailed and resourceful professional with experience in technical troubleshooting, lab coordination, mentorship and logistics. Have the ability to design and prototype using Arduino/Espruino/ESP32/Puck, with extensive knowledge in JavaScript/C++/Python. Having a problem-solving mindset, as well as, a strong user-centered oriented design approach. Seeking to apply my technical oriented skill, but also centering on design practices to help me grow in the industry.

Work Experience

Teacher Assistant (IOIO Lab)

09/2024 – 07/2025

Malmö University • Malmö, Sweden

- Lab Coordination: Manage deployment and maintenance of electrical boards, Arduino kits, and specialized prototyping tools for the Interaction Design department.
- Technical Troubleshooting: Diagnose hardware failures and coding bugs (C++/Arduino/JavaScript) for students, ensuring high uptime for lab resources.
- Infrastructure Maintenance: Organize and prepare lab kits, taking the responsibility for maintaining the lab's components and logistically check on rented equipment.
- Mentorship: Guide students through technical setups, supervising students on building concepts into functional hardware/software prototypes.

ATM Logistics

06/2023 – 08/2023

Brink's Romania • Constanța, Romania

- Verification & Quality Control: Performed rigorous quality checks on ATM cash components, making sure that it follows 100% compliance with banks requirements.
- Inventory Management: Tracked county-wide supplies and coordinated with partner banks to fulfill all their orders of refilling theirs ATMs.
- Operational Reliability: Maintained a strict schedule of prep and delivery, demonstrating the responsibility needed for hardware-heavy verification roles.

Education

Bachelor of Science - Interaction Design

08/2023 – Present

Malmö University • Malmö, Sweden

- Concentrated studies in Tangible Interfaces, Prototyping, and Sonic Interaction.
- Thesis research focused on exploring Non-Newtonian fluids as a physical MIDI Controller. This led in using the material inherent feedback as means of control of sonic qualities but also enforcing user's embodied act with the sound.

High School Diploma - Computer Science

09/2018 – 07/2021

Colegiul National Barbu Știrbei •

- Acquired foundational knowledge in C++, algorithms, and mathematical analysis.

Skills

Rapid Prototyping

Usability Testing

3D Modeling & Printing

Hardware Prototyping

Participatory Design

Co-design

Laser Cutting
